

I am very concerned about the potential for interference if BPL is allowed to move forward at this time. I feel that there has been sufficient field tests have been conducted to prove that BPL would be detrimental to the amateur spectrum on HF. I believe that modifying Part 15 rules to allow for it without additional, and more thorough, testing would cause a serious decrease in the ability of amateur radio to provide emergency communications in times of need. I think this far outweighs the need/possibilities for BPL in its current form.
